DIGESTAZE™

Vegetarian Digestive Enzyme Supplement

The Importance of Enzymes

Insufficient enzyme production is a major contributor to intestinal distress, including symptoms of gas, bloating, and intestinal pain. Even more concerning is that low digestive enzyme circulation can actually significantly impair the body's ability to absorb good nutrition.

When your patients consume more processed foods, their intake of natural enzymes from raw, whole foods greatly diminishes. This calls on an even greater need for the body to produce its own digestive juices. Supplementing with a quality digestive supplement like **Digestaze™** may be essential to support their digestive health.

Broad-Spectrum Digestive Support

Digestaze™ combines 18 different digestive enzymes AND brush-border enzymes for a more thorough approach to the breakdown of nutrients. Protease (including acid-stable protease), Lipase, and Amylase are essential for the initial breakdown of proteins, fats, and carbohydrates. Brush-border enzymes including malt diastase, glucoamylase, lactase, and peptidase, are naturally secreted by the intestinal cells to further breakdown carbohydrates and proteins.

Alpha Galactosidase

As seen in the popular digestive aid Beano®, alpha galactosidase has the power to help break down challenging carbohydrates that for many patients can cause uncomfortable gas and bloating.¹

Bromelain and Papain

From pineapples and papayas respectively, these protease enzymes have been implicated in everything from digestive support, to reducing inflammation, and even interfering with tumor cell growth.²

Cellulase and Hemicellulase

Not only do these enzymes help with the digestion of plant fibers, they may also help clear the body of unwanted yeasts. The cell wall of *Candida* is made up of

cellulose. These enzymes help break down *candida's* cellular infrastructure facilitating its elimination.

Lactase

Necessary for the breakdown of lactose, a sugar found in milk that is often the culprit behind dairy sensitivity or lactose intolerance. Lactase helps breakdown lactose for support of dairy tolerance.³

POWERFUL

Powerful, broad-spectrum, and concentrated enzyme blend

SUPPORTIVE

Supports healthy digestion of even the most problematic foods

RELIEF

May help relieve symptoms of discomfort associated with poor digestive function

Supplement Facts

Serving Size: 1 Capsule
Servings Per Container: 90

Amount per Serving	% DV†
Digestive Enzyme Blend	
Protease	65,000 HUT ‡
Papain	20,000 TU ‡
Amylase	3,000 SKB ‡
Bromelain	55 GDU ‡
Amyloglucosidase (Glucoamylase)	20 AG ‡
Cellulase	2,500 CU ‡
Phytase	10 U ‡
Pectinase	30 Endo PG ‡
Lactase	800 ALU ‡
Beta Glucanase	20 BGU ‡
Invertase	1250 Sumner ‡
Malt Diastase	125 DP ‡
Peptidase	1,500 HUT ‡
Lipase	750 FIP ‡
Acid Stable Protease	250 HUT ‡
Xylanase	125 XU ‡
Hemicellulase	75 HCU ‡
Alpha Galactosidase	200 GAL ‡

†Percent daily values (%DV) are based on a 2,000 calorie diet. ‡Percent daily values not established.

OTHER INGREDIENTS: microcrystalline cellulose, vegetable capsule (HPMC water), magnesium stearate, silicon dioxide

Suggested Use: As a dietary supplement, take one capsule per day away from food or as directed by a healthcare professional.

Warnings: If pregnant or breastfeeding, consult with your healthcare provider before use.

Storage: Does not require refrigeration. For best results keep at stable temperature 75°F and under.
