

# BIOLOGICAL COMPLEX

## BIOLOGICAL COMPLEX I

**Indications:** For temporary relief of symptoms related to systemic or cutaneous infection from Smallpox exposure. Symptoms may include severe cold, chill, chilly creepings as if cold water were trickling down the back, violent fever with extremely hot skin, violent headache, nausea, pain in limb as if in bones, and/or severe backache.

**Ingredients:** VARIOLINUM (Smallpox) 30C.

**Chronically ILL:** Begin with 3 drops three times daily for one week, wait three weeks, then increase dosage to 5 drops for one week. Increase dosage two drops each interval until 10 drops per dose are tolerated.

**Children 5 to 12:** Treat with ½ the adult dosage.

**Under 5 years:** Begin with 1 drop, increasing to 3 drops 3 times daily over a 3 week period, taking the remedy on alternating weeks; on a week, off a week.

**Alternate Protocol:** All ages, 10 drops once a day for one week, then 10 drops once a week thereafter until one or two bottles have been used. At risk people continue treatment indefinitely.

**Supportive products:** Biological Complex I should be used in conjunction with a drainage remedy such as Lymph Drainage from Deseret Biologicals. Also, Stress EZ may assist in relieving patient fears and anxiety. In all cases patients should heed the advice of their health professional.

**Dosage:** One to 10 drops, three times daily for one week. Wait three weeks then repeat. This “pulse therapy” should be repeated until the contents of one or two bottles have been used. Or follow the directions provided by your health professional.

## BIOLOGICAL COMPLEX II

**Indications:** For temporary relief of symptoms related to Anthrax exposure including painless sores followed by fever, chills and swollen, infected lymph glands above the area of the sore.

**Ingredients:** ANTHRACINUM 30C.

**Chronically ILL:** Begin with 3 drops three times daily for one week, wait three weeks, then increase dosage to 5 drops for one week. Increase dosage two drops each interval until 10 drops per dose are tolerated.

**Children 5 to 12:** Treat with ½ the adult dosage.

**Under 5 years:** Begin with 1 drop, increasing to 3 drops 3 times daily over a 3 week period, taking the remedy on alternating weeks; on a week, off a week.

**Alternate Protocol:** All ages, 10 drops once a day for one week, then 10 drops once a week thereafter until one or two bottles have been used. At risk people continue treatment indefinitely.

**Supportive products:** Biological Complex II should be used in conjunction with a drainage remedy such as Lymph Drainage from Deseret Biologicals. Also, Stress EZ may assist in relieving patient fears and anxiety. In case of actual infection, use of antibiotics is strongly recommended. In all cases patients should heed the advice of their health professional.

**Dosage:** One to 10 drops, three times daily for one week. Wait three weeks then repeat. This “pulse therapy” should be repeated until the contents of one or two bottles have been used. Or follow the alternative directions provided by your health professional.

## BIOLOGICAL COMPLEX III

**Indications:** For relief of symptoms related to systemic or cutaneous infection from specific biological substances; including headache, nausea, abdominal pain, chills, diarrhea, blurred vision, or food poisoning.

**Ingredients:** (All in 30C)

ARSENICUM ALBUM: Debility, exhaustion, anxiety and restlessness.

BOTULINUM: Food poisoning, caused by the neurotoxin botulin produced by the growth of Clostridium botulinum.

COXIELLA BURNETII: The etiologic agent of Q Fever. Human infection usually occurs from contaminated dust or aerosols.

DIPHtherinum: Prophylactic in Diphtheria.

DYSENTERY BACILLUS: Nervous tension, indigestion, “anticipatory” GI reaction.

FRANCISELLA TULARENSIS: Prophylactic in Tularemia (Rabbit Fever), an infectious, plaguelike, zoonotic (transmittable from animal to human) disease.

GAERTNER BACILLUS: Prophylactic in Gaertner Bacillus infection, salmonella and enteritis.

MALARIA OFFICINALIS: Prophylactic in conditions of Malaria, headache, nausea, aversion to food, cramps, diarrhea.

MUTABLE BACILLUS: Bacillus with mutations.

PERTUSSINUM: Spasmodic coughing attacks, restlessness, paralysis, neuro-motor deficit.

PESTINUM: Prophylactic in conditions of Plague.

PYROGENIUM: Influenza like conditions with digestion problems, nephritis.

STAPHYLOCOCCINUM: Prophylactic in conditions of Staph infection.

STREPTOCOCCINUM: Prophylactic in conditions of Strep.

TYPHOID: An acute infectious disease caused by salmonella gallinarum infection.

**(All in 3X)**

BERBERIS VULGARIS: Support of nervous system and digestion.

CARDUS MARIANUS: Support of the liver and portal system with symptoms of soreness, pain and jaundice.

CHELIDONIUM MAJUS: Support of liver, spleen and kidneys.

CROTALUS HORRIDUS: Nervous shock, trembling and prostration.

LOBELINUM: Works on the pneumogastric nerve producing a relaxed condition while impeding nausea and vomiting.

RUMEX CRISPUS: Also called Yellow Dock. Sharp pains and neuralgia.

SAMBUCUS NIGRA: Ill effects of fright, grief and anxiety.

SABGYUBARUA NITRICUM: Addresses acute catarrh, pharyngitis, burning in throat, headaches, influenza symptoms.

SENEGA OFFICINALIS: Addresses catarrhal symptoms of the respiratory tract and bladder including accumulation of mucus soreness in the chest and pressure on the lungs.

SPONGIA TOSTA: Timidity, fear and terror with anxiety.

TARAXACUM OFFICINALE: Liver support, headache, jaundice, and digestive problems.

**Supportive products**: Biological Complex III should be used in conjunction with a drainage remedy such as Lymph Drainage from Deseret Biologicals. Also, Stress EZ may assist in relieving patient fears and anxiety. In all cases patients should heed the advice of their health professional.

**Dosage**: One to 10 drops, three times daily for one week, wait three weeks, then repeat cycle, or as directed by your health professional.
